SUMMARY

A Computer Science engineer who fell in love with UX, then with business strategy, and somewhere along the way picked up every piece of product management without realising it. Brings together user research, technical fluency, data-driven decision making, and end-to-end product execution — across an enterprise AI redesign at Ericsson and new product development at a founder's office.

EDUCATION

M.S. Ramaiah Institute of Technology
Bachelor of Engineering, Computer Science & Engineering

Bengaluru, Karnataka
2022–2026

SKILLS

Product: Product Roadmapping, PRDs & User Stories, Backlog Prioritization, Feature Scoping, Problem Statement Definition, Feasibility vs. Impact Analysis, Go-to-Market Strategy, Product Lifecycle Management
Research & Analytics: User Research, Usability Testing, Heuristic Evaluation, Competitive Benchmarking, Data Analysis, SQL, Power BI (DAX, ER Modelling), A/B Testing, Market Research
Design & Prototyping: Figma, FigJam, Wireframing, Lo-Fi & Hi-Fi Prototyping, Design Systems, UX Writing, Accessibility Design
Process & Collaboration: Agile, Cross-functional Stakeholder Management, SOP Design, Process Documentation, Technical Specification Writing
Technical: HTML, CSS, JavaScript, React, Python, SQL, MongoDB, Azure, Prompt Engineering
Certifications: Google UX Professional Certificate Program; Product Design & Innovation — IISc

EXPERIENCE

Ericsson

Bengaluru, Karnataka

UX & Product Intern

July 2025 – September 2025

- Owned end-to-end product discovery and redesign for an enterprise GenAI platform used by **88,000+ employees** — defined problem statements, conducted **10+ user research sessions** across **10+ user personas**, and mapped user journeys to identify drop-off points and adoption barriers.
- Audited **40+ product issues** across technical, navigational, and instructional dimensions; applied feasibility vs. impact prioritization to propose **20+ improvements** — all accepted and currently being implemented org-wide.
- Delivered Figma prototypes (lo-fi and hi-fi) aligned with enterprise design system; iterated across multiple rounds based on stakeholder feedback — following a research-validate-iterate cycle analogous to Agile product development.

Wholsum Foods Pvt. Ltd.

Gurugram, Haryana

Founder's Intern

January 2026 – April 2026

- Built a **3-year product roadmap** for the cookie category — defining pack formats, flavor variants, seasonal releases, and new market segments across 6-month, 1-year, and 3-year horizons; benchmarked **10+ competitors** to validate strategy and support revenue targeting.
- Led new product ideation across **10+ categories** — defined problem statements, target user segments, formulation direction, pricing, and GTM strategy; presented savory pancake concept directly to founders with feature rationale, launch timing, and market positioning.
- Wrote product and compliance specifications for **20-30 product launches** — documented requirements across FSSAI, NLEA, BCORP, and packaging standards; created standardized SOPs and briefs adopted across Legal, R&D, and Marketing teams.
- Resolved a compliance crisis blocking **20+ product launches** — diagnosed root cause across **500+ SKU records**, designed end-to-end resolution process, coordinated cross-functional teams across **3 cities**, and implemented a forward-looking process to prevent recurrence.
- Built Power BI dashboards from scratch (data sourcing, web scraping, DAX, ER modelling, visualization) to surface channel performance insights; supported SKU discontinuation and MRP decisions using primary and secondary sales data.

PROJECTS

PromptSense: Designed an AI-powered prompt optimization tool that structures prompts using prompt-engineering frameworks and tracks sustainability impact through a resource usage dashboard.
Independent UX Consulting: Conducted heuristic evaluations and UX audits for **12+ projects** — defined problem statements, prioritized issues by impact, and delivered structured recommendations. **100% of implementations** led to competition wins or improved user outcomes.
AI Placement Preparation Platform (In Development): Contributing to product design of an AI-powered tool with behavioral analysis, curriculum-aware training, and role-matched preparation pathways.

LEADERSHIP

UXRIT — UX Club, MS Ramaiah Institute of Technology

Bengaluru, Karnataka

Founder & President

December 2024 – Present

- Founded and scaled to **240+ members** in 6 months; led a **20-member** team, hosted **7 events** with **90+ participants**, and secured collaborations with IEEE and IISc.
